CIVIL RAILWAY WORKS

On track for excellence.

Our experience and knowledge of this sector enables us to develop all kinds of projects in the area of Civil Railway Works

The rail transport sector is one of the most dynamic owing to investment effort made by public bodies in actions aimed at improving speed, duplicating tracks, renovation and improvements to infrastructure, above all on the high-speed routes and on the metropolitan and suburban lines.

Over the course of its existence, MDE has carried out numerous railway works, both of infrastructure and superstructure, in all the categories of this means of transport, from high-speed lines to the metro and the new trams, including the maintenance and renovation of existing lines as well as the construction and remodelling of new stations.

To tackle the execution of these projects, MDE relies on an experienced and specialised multidisciplinary team, which includes safety personnel equipped to deal with the main official bodies at national level.

On track for excellence.
