REHABILITATION

At the service of the community.

REHABILITATION

After a long period of continuous urban growth, the moment has come to our gaze back towards the state of these constructions to develop a culture of rehabilitation and maintenance which provides some balance to the attention that we have been giving to new build.

The buildings constructed decades ago are showing important deficiencies with respect to the quality that would be considered essential today, but this can be rectified if we act upon them with rigour and imagination.

We are also aware of the urgent need to reduce energy consumption and adapt existing buildings with the kind of facilities that new constructions enjoy, prioritizing the sustainability, energy efficiency and profitability of these investments.

That is why at MDE we offer our services to government, companies, owner's associations and individuals with a view to repairing the deficiencies in their buildings, improving their facilities and reducing energy consumption

At the service of the community.
