MDE

HOSPITALS AND HEALTH CENTRES

Construction at the service of health.

Our company has great experience in new build as well as improvements or expansion to health centres, providing all the organisational and technical resources necessary to ensure service is not disrupted and guarantee the complete safety of personnel.

MDE sources the integral equipment of the centres it constructs with the latest generation of technology. For instance, the renovation of surgical blocks to adapt them to the latest sterility specifications, resuscitation units, or the adaptation of facilities to provide environmental safety on children's wards.

The construction of health centres is as much for the public system as, increasingly, for private initiatives
